3+ years of experience in web application development, working mostly with JavaScript; React as frontend framework and NodeJS as backend solution. I understand business requirements, prioritise work based on highest business value and work with teams to solve problems.

Relevant Experience

Software Developer (contractor) at IBM

Dec 2018 - Present

I worked on the TAMM Project here In Abu Dhabi. It is an impactful project aiming to revolutionise how citizens of Abu Dhabi interact with government services.

Built highly optimised frontend visualisation of investment data using charts, graphs, highly interactive investment maps and business calculators for potential business investors.

Managed business processes with camunda business process modeler, while following agile software programming practices.

Wrote Frontend and Backend tests.
